

## Preparando o ambiente

### TK4- e HERCULES

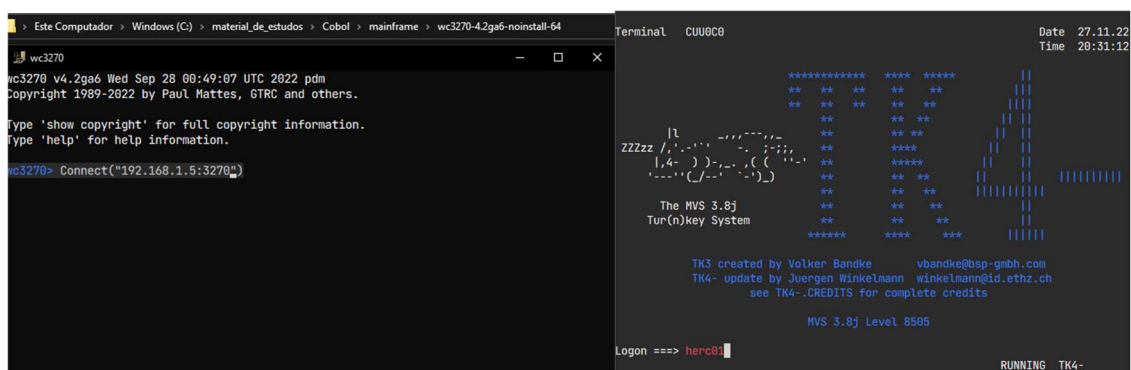

O Hercules é um emulador de computador que permite que o software escrito para computadores **mainframe da IBM** (System / 370, System / 390 e zSeries / System z) e compatíveis sejam executados em outros tipos de hardware como computadores pessoais.

TK4- que irá servir o HERCULES na sua máquina pessoal.

```
HERCULES - System Status: RED x + v
PS C:\tk4> .\mvs.bat
HHC01413I Hercules version 4.00.0
HHC01414I (c) Copyright 1999-2012 by Roger Bowler, Jan Jaeger, and others
HHC01415I Built on Jul 15 2013 at 13:54:54
HHC01416I Build information:
HHC01417I Windows (MSVC) build for AMD64
HHC01417I Modes: S/370 ESA/390 z/Arch
HHC01417I Max CPU Engines: 32
HHC01417I Using fthreads Threading Model
HHC01417I Using Error-Checking Mutex Locking Model
HHC01417I Using FishIO
HHC01417I With Dynamic loading support
HHC01417I Using shared libraries
HHC01417I With External GUI support
HHC01417I With IPV6 support
HHC01417I With HTTP Server support
HHC01417I With sqrtl support
HHC01417I Without SIGABEND handler
HHC01417I With CCKD BZIP2 support
HHC01417I With HET BZIP2 support
HHC01417I With ZLIB support
HHC01417I With Regular Expressions support
```

### Emulador do terminal X3270

Conectar no IP da sua máquina:

→ usuário: HERC01 → senha: CUL8TR

Para desconectar corretamente sem danificar os discos de sua máquina, pressione f3 até chegar a tela com letras vermelhar e execute a job SHUTDOWN e depois LOGOFF:

```
*****
*** TSO Applications Menu terminated.          ***
*** Enter TSOAPPLS at the READY prompt to restart. ***
*****
READY
shutdown
JOB SHUTDOWN(JOB00003) SUBMITTED
READY
logoff
```

Depois aguarde o desligamento do servidor acabar.

```
[wc3270]

Disconnected.
